Introducing the MK-EZ Profiler

MK Diamond Introduces New Product at Surfaces Show

The new MK-EZ Profiler makes profiling tile, granite, marble and stone easy. It is highly portable and is designed to provide fabrication quality performance on any jobsite. It can bevel and bullnose material up to 18" long. There is a complete range of standard profile shapes available as accessories. Convenient access to the arbor shaft makes for easy profile tool changes. The adjustable head allows up to 1" profiling. The profiler is housed in a thermoplastic pan for water containment and easy cleanup.

The powerful, high-torque motor offers 1-1/4 horsepower. The MK-Safeswitch™ prevents profiler from being operated when locking key is removed. Built with a heavy-duty reinforced steel frame, the MK-EZ is designed to ensure long life and superior performance. The MK-EZ Profiler, patent pending, is made in America.

MK Diamond is a world class manufacturing company dedicated to the development of innovative products geared to the specific needs of customers. A leader in the concrete, masonry and tile industry, MK Diamond Products, Inc. has been American-owned since 1868. For more information call 800 421-5830 or visit mkdiamond.com.
