## The New MK-101-24

The MK-101-24 Wet Cutting Tile Saw was engineered to meet today's demands. It is the first affordable tile saw that provides a 24" length of cut and the quality that MK Diamond is recognized for. "With the trend of larger tiles, this saw was a must to manufacture," states Brian Delahaut, Vice President, MK Diamond Products, Inc. It is engineered for cutting large tile, marble and porcelain.

The built-in water distribution system supplies water to both sides of blade for maximum efficiency of water flow. The Baldor electric 1-1/2 HP/120v fully enclosed, high torque, fan-cooled motor is the power behind the blade and delivers long, reliable service. The Micro V-belt drive provides an optimized blade shaft speed of 3,000 rpm for smooth delivery for motor power and torque.

The saw was designed with a multi-position motor post and cutting head for convenient cutting of various tile sizes. The variable height cutting head allows for plunge cuts and use of blades smaller than 10" in diameter. The blade guard is wide enough to accommodate 6" and 8" profile wheels. The linear-bearing and chrome plated guide-bar assembly ensure precise cutting. This 10" wet cutting tile saw, with a 5/8" arbor, produces a 3" depth of cut, 24" length of cut and diagonally cuts 18" material. The permanently lubricated, dual-sealed blade shaft bearings provide years of maintenance-free operation.

MK101-24 features:

- Fully enclosed thermally protected, high torque, fan-cooled motor
- Permanently lubricated, dual-sealed blade shaft bearings
- Multi-position motor post and cutting head for convenient cutting of various tile sizes
- Built-in water distribution system supplies water to both sides of blade
- Variable height cutting head allows for plunge cuts and use of blades smaller than 10" in diameter
- Accommodates 6" and 8" profile wheels
- Blade shaft lock for easy blade removal
- Linear-bearing and chrome plated guide-bar assembly ensure precise cutting
- Cast aluminum blade guard and motor post
- Made in the USA

MK Diamond Products, Inc. is a recognized world leader in the manufacturing of precision diamond blades and equipment for cutting, coring and polishing all types of masonry, concrete, tile and stone products. For more information call 800/421-5830.
