Blade not included

MX-5 Masonry Saw

The MX-5 Masonry Saw is built for mason contractors who want to cut an 8" block in a single pass or need a saw for production work. The standard 20" aluminum blade guard is self-leveling and provides optimum blade coverage during all cutting operations. The single micro-V belt system provides maximum horsepower transfer from the motor to the blade shaft. Two self-aligning bearings ensure that the blade shaft will always run true and provide easy access for maintenance. The integrated forklift brackets provide safe and convenient transportation of the saw to and around the job site. The MX-5 is built on the same principles as all the MK Diamond saws, with performance and safety features that meet masons' needs at the right price point.

Motor	Baldor
Power	5Hp, 240V 1Ph 60Hz
Arbor	1"
Blade Capability	20"
Depth of Cut	8"
Length of Cut	23"
L x W x H (inches)	54" x 25" x 62"
L x W x H (mm)	1,372 x 635 x 1575
Weight	435 lbs
Includes	Electric Water Pump Rip Guide
Part#	171234

(Motor available in other electrical configurations.)

Heavy-duty cast aluminum conveyor cart

Foot pedal for hands-free cutting head operation

Open-back design allow for materials up to 20" long to be cut
