## Updating an old Pro

Torrance, CA, April 11, 2008 – The MK-101 Pro 24 has been tried and true for tile professionals for years. “As new technologies become available we look at our core products to see if we can improve them with the new materials available today,” states Brian Delahaut, Vice President of MK Diamond Products, Inc.

So now the MK-101 Pro 24 features a new durable neoprene tablemat that will not deteriorate and guarantees a long service life. The over-molded tablemat grips tile more firmly to ensure precise cuts and protects the table surface from scratches and dents.

The saw continues with features the professional desires with a multi-position motor post and cutting head for convenient cutting of various tile sizes. The variable height cutting head allows for plunge cuts and use of blades smaller than 10" in diameter. The blade guard is wide enough to accommodate 6" and 8" profile wheels. The linear-bearing and chrome plated guide-bar assembly ensure precise cutting. This 10" wet cutting tile saw, with a 5/8" arbor, produces a 3-3/4" depth of cut, 24" length of cut and diagonally cuts 18" material. It features a locking blade shaft for easy blade removal. The permanently lubricated, dual-sealed, heavy-duty blade shaft bearings provide years of maintenance-free operation.

The built-in water distribution system supplies water to both sides of blade for maximum efficiency of water flow. The heavy-duty Baldor electric 2 HP/120v fully enclosed, high torque, fan-cooled motor is the power behind the blade and delivers long, reliable service. The Micro V-belt drive provides an optimized blade shaft speed of 3,000 rpm for smooth delivery for motor power and torque.

The 130-pound MK-101 Pro 24 is durably built, with a one-piece reinforced zinc-plated steel frame, cast aluminum blade guard and motor post. Made in the USA with a two-year limited warranty.

Accessories included with MK-101 Pro Saws include a 10" MK-225 HotDog Blade, water pump, cutting kit, side extension table and a folding saw stand with casters.

MK Diamond Products, Inc. is a recognized world leader in the manufacturing of precision diamond blades and equipment for cutting, coring and polishing all types of masonry, concrete, tile and stone products. For more information call 800/421-5830.
