

5" Swing Shroud

The MK Diamond 5" Swing Shroud is designed for concrete and surface grinding dust control. The shroud is made from an "abrasive resistant" plastic to prevent wear from the grinding process. The swing nose easily flips to the side for grinding against walls and edges. The use of a shroud prolongs the life of the tool by preventing abrasive dust and debris from entering the motor.

The 5" Swing Shroud is easy to install on most popular grinders using the included adapters.

- Developed for dust control when grinding concrete, masonry and mortar with a 4"-5" cup wheels or abrasive discs
- Easily attaches to a HEPA vacuum or dust extractor system to reduce harmful airborne dust
- The front nose easily swings away for edge work
- Increases cup wheel life by removing abrasive dust
- Dust control reduces clean up time and crystalline silica dust exposure
- Designed for use when cleaning, leveling spots, removing epoxies, urethanes, paint and other coatings

Description	Part#
5" Swing Shroud (Clamshell Packed)	172360
5" Swing Shroud (Carton Packed)	170762

MK has a complete line of cup wheels & pads, view at www.mkdiamond.com

⚠ WARNING: Cancer and Reproductive Harm - www.p65warnings.ca.gov

Installs easily on most 4", 4-1/2" and 5" grinders.

Easily attaches to vacuums or dust extractors

Designed for 4" - 5" diamond cup wheels

Carton Packed
Part # 172366

Part # 172360

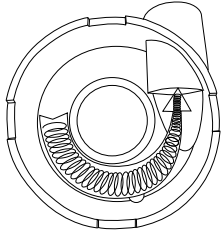

MK-IXL 5-inch Full Vacuum Shroud

The MK Diamond IXL 5" Full Vacuum Shroud is for concrete and surface grinding dust control. The shroud easily attaches to a vacuum or dust extractor resulting in a cleaner working environment and increasing visibility during grinding. It assists in capturing airborne particles thus protecting workers from dangerous crystalline silica.

The MK-IXL 5" full vacuum shroud is easy to install on popular grinders.

- Developed for dust control when grinding concrete, masonry and mortar
- Increases cup wheel life by removing abrasive dust
- Dust control reduces clean up time and provides better visibility for operator
- Designed for use when cleaning, leveling spots, removing epoxies, urethanes, paint and other coatings
- Fits popular 4"-5" hand grinders using included adapters

Description	Part#
5" Full Vacuum Shroud	172366

Cyclone Dust Extraction System

The IXL shroud's snail shape design utilizes the air velocity created by the rotating grinding wheel to efficiently channel dust particles away from the work surface and into the vacuum port. This technology results in less airborne dust, less cleanup and improved grinding efficiency.

Carton Packed Part # 172366

Fast and easy to install on hand grinders

Easily attaches to vacuums or dust extractors

Designed for 4" - 5" diamond cup wheels
